

## Military Storage Lockers

Quick to install and rock solid once in place, WireCrafters has supplied TA-50 Military Storage Lockers and other types of storage solutions for the demanding requirements of the military and other government agencies for years. Our storage lockers are built to last.

### Locker Security

TA-50 Military Storage Lockers can be customized and configured with different options and accessories within the lockers. Typically, these storage lockers come equipped with a double hinged door on the front of the locker featuring a three point lock which will accept a user-supplied padlock. The three point lock is very secure; a rod is engaged at both the top and bottom of the storage locker and a heavy steel padlock lug is positioned in the center of the door.
